	MISSING issue		185, August 2000	

A short note on this index. This list corresponds to the major entries in the newsletter that would have been written specifically on an event. There could easily be, and there probably is, commentary or reference to events in other places in these, or subsequent issues. Check subsequent months for articles and information if you are seeking something specific. For some events, notably the Birthday Party, articles appeared later.

It is hoped that, eventually, this PDF can be indexed and placed on the new OVLR website

where clicking on a particular entry will open the correct newsletter for the reader.

Missing issues are those particular printed issues where a complete copy is missing in the Archives

There are about 350 lines of data here, so plenty of room for mistakes in transcription. If someone wants to look at the issues from 1984 to 1993, and extract where events were discussed, I would be happy to add in the information. It would primarily be green-laneing, the Birthday Party and the Maple Syrup Rally.
